WASHINGTON WORKS
BLOOD C-8 LEVELS FOR NON-FLUOROPOLYMERS DIVISION EMPLOYEES

As you requested, detailed blood C-8 data on Washington Works employees who have not worked in the Fluoropolymers Division are attached. A summary of this data is as follows:

<u>AVG. LENGTH OF EMPLOYMENT AT WASHINGTON WORKS (MONTHS)</u>	<u>NO. OF PERSONS</u>	<u>AVG. BLOOD C-8 LEVEL (PPM)</u>
8	14	0.027
24	3	0.020
48	1	0.034
92	1	0.022

As you can see, Washington Works employees who have not worked in the Fluoropolymers Division have small amounts of C-8 in their blood. However, it appears that the blood C-8 levels reach an equilibrium level in less than a year.
